Higher School Certificate (HSC) results

The Principal of Hennessy Catholic College, Dr Peter Webster, today congratulated the Year 12 students and staff on achieving outstanding HSC results. These results are a fantastic reflection of the quality of young people in our region. Hennessy is proud of the achievements of these young people.

Higher School Certificate: ‘Hennessy students have achieved quality results’, stated Mrs Kathy Holding – Director of Curriculum. Mrs Holding adds, “To achieve such results is testimony to the dedication and talents of our students and staff. The relationships between students and teachers are the key to our success at Hennessy. To have 80% of subjects above State Average is an outstanding achievement, this is the best result ever for the College. The performance of students in English, General Mathematics, Modern History, Extension History, Community and Family Studies, Personal Development Health and Physical Education, Studies of Religion II are significantly above State Average, this an outstanding achievement and ranks our students with the best in the State. It is pleasing to see students achieving Band 6s in the Creative and Performing Arts areas of Visual Arts and Music.

Subjects above State Average: 80%
Bands 5&6: 37%
Band 6s: 7%

Future focus: Dr Webster said “Hennessy’s Year 12 students will be offered a variety of university places whilst many are already winning apprenticeships, traineeships and work placements in our region”. Dr Webster comments, “The results support the promotion quality teaching and high expectations within our College. Hennessy students are accessing the best university courses in the best universities. I am proud of our students and their teachers.”

Catering for all students: Mr Andrew Fouracre - Dean of Growth and Performance states, "At Hennessy students are able to study a range of subjects and achieve outstanding results. I am particularly impressed with Senior Science, Industrial Technology – Timber and Hospitality which are all performing significantly above State Averages"
